

## WELCOME TO YOUR NEW PRESCRIPTION COVERAGE

As Ventegra's newest member, we welcome you to your new **formulary** (also known as a **covered drug list**). Our formulary has been developed by a committee of physicians and pharmacists to ensure the provision of safe, efficacious, and cost-effective drug therapy. We recommend that you review the new formulary carefully with your physician as you may be taking medications that are no longer covered or require a new prior authorization.

Your new formulary can be found by visiting the Multicare Employee Resource Center and downloading the Multicare Health System Formulary.

If you are currently taking prescription drugs that may require a prior authorization (as noted "PA" on the formulary), we recommend that you contact Ventegra as early as January 1, 2022 to discuss your options and determine what next steps need to be taken. We are working with your employer to get all the information needed to continue any approved prior authorizations and will simply be updating these as any existing PAs expire.

In addition, it is important to note that there will be some changes to your current formulary as of January 1<sup>st</sup>, 2022. Below is a list of some key differences between your current formulary and Ventegra's. If you are taking any of the medications in the left column, please contact your prescriber to discuss how to transition to the new preferred drugs listed on the right.

No longer preferred (Starting 1/1/2022)	Preferred Drug (Starting 1/1/2022)
