WELCOME TO VENTEGRA'S PHARMACY NETWORK

Ventegra is here to help you with the transition to your new pharmacy network. It's a quick and easy process! If you would like to switch pharmacies, choose the best pharmacy for you out of our wide range of options. Our network includes national chains as well as independent pharmacies.

Follow the steps below to maximize your health benefits.

✓ **Get the most out of your pharmacy network.**

Save money by filling your prescriptions in-network.

When you visit in-network pharmacies, your health plan covers certain prescriptions. This means you don't have to pay the full cost of those medications.

If you go to an out-of-network pharmacy, the prescriptions may not be covered, so you'll have more out-of-pocket costs.

✓ **Locate participating in-network pharmacies using your member portal.**

Only network-participating pharmacies will appear in the Pharmacy Locator function. See below for a step-by-step guide on how to use this tool.

Step 1: Find the "Pharmacy Locator" Tab

The "Pharmacy Locator" tab is on the top blue bar. Click on this link to proceed to the next step.

We're here to help

Treatments for complex and chronic diseases often require special medicines. Some of these medications aren't available at a regular pharmacy. Our trusted team works with your medical provider and insurance company to get you the medications you need.

We're here to support you in understanding your treatment plan, following medication instructions and staying on track with refills.

HERE'S HOW IT WORKS:

- We receive a prescription from your provider
- We work with your insurance company to authorize treatment
- We help to find programs you may be eligible for to reduce or eliminate your copay
- We work with you to arrange the delivery of your medicine on your schedule
- We provide phone consultations with your pharmacist to discuss your medication
- We monitor your refills to ensure you never miss a dose

A SPECIALTY MEDICATION:

- Is usually prescribed to treat complex and often chronic health conditions like multiple sclerosis or cancer
- Is often high-cost and may require a copay
- Often requires special handling, storage, disposal, and shipping/delivery requirements
- Has complex and specific monitoring, along with patient education needs
- Is often not stocked at traditional retail pharmacies
